

The 2017 Total Solar Eclipse

Ask Us About Eye Safety

Don't be fooled by the eclipse - it is never safe to look directly at the sun, even when wearing eyeglasses with Transitions® lenses. Eye safety is not only important during the eclipse, but all year long!

You don't have to avoid enjoying the sun - but you should always protect your eyes. Ask us today about Transitions® lenses, which help protect your eyes from glare, UV rays, and harmful blue light.

Eclipse Date: Monday, August 21, 2017
