

Ask your patients who wear their eyeglasses all day:

1. How often are you
**bothered by bright
light** while wearing
your glasses outdoors?

Never

Sometimes, Often, or Always

Based on your response,
**Transitions® lenses are going
to meet a real need** for you
because they:

- **Seamlessly adapt** to changing light
- Help you **see more comfortably** with less glare, eyestrain, and eye fatigue
- **Help protect** from UV rays and harmful blue light, indoors and out

Transitions®
ADAPTIVE LENSES®

Find out which *Transitions*[®] lens is right for your patient

2. What is most important to you?

**Clear lenses
indoors**

Transitions[®]
Signature[®]

- Clearest indoors
- Fast fade-back speed

**Extra
protection
from light**

Transitions[®]
XTRActive[®]

(even in the car)

- Extra dark in hot, bright sun
- Hint of tint for harsh indoor light
- Darkens in the car

**Extra glare
protection**

Transitions[®]
Vantage[®]

- Lenses polarize as they darken
- Crisper, sharper vision outdoors
